**CITY OF NEWPORT
2014 WATER QUALITY REPORT RELEASED**

The 2014 City of Newport Water Quality Report has been released and is available on the city website at www.newportoregon.gov/dept/pwk/waterquality. Hardcopies are available at the Public Works Department, City Hall, 169 SW Coast Highway, Newport.

Once again, the city's tap water has met all U.S. EPA (Environmental Protection Agency) and state drinking water health standards. The water quality report is a requirement of the 1996 Safe Drinking Water Act, and is designed to increase public awareness of drinking water issues, and to serve as a method for customers to make informed decisions regarding drinking water.

The water quality report is designed to inform the public about the quality of water, and the city's goal of providing a safe and dependable supply of drinking water every day. The city makes every effort to continually improve the water treatment process and protect its water resources.

Questions regarding the report should be directed to Tim Gross, Public Works Director, at t.gross@newportoregon.gov; or Steve Stewart, Water Plant Supervisor, at s.stewart@newportoregon.gov.
