

## 2016 WATER QUALITY REPORT

The City of Newport Water Quality Report is available for viewing via our website [www.newportoregon.gov/dept/pwk/waterquality](http://www.newportoregon.gov/dept/pwk/waterquality) . If you would like a copy please contact the Water Treatment Plant at 541-265-7421

We are proud that this year, as in years past, the City's tap water met all U.S. Environmental Protection Agency (EPA) and state drinking water health standards. The water quality report is designed to inform the public about the quality of water and the services the City delivers every day; our goal is to provide a safe and dependable supply of drinking water. The City makes every effort to continually improve the water treatment process and protect our water resources. The water quality report is a requirement of the 1996 Safe Drinking Water Act and is designed to increase public awareness of drinking water issues and to serve as a method for customers to make informed decisions regarding their drinking water.

If you have questions or would like more information, feel free to contact Steve Stewart, Plant Supervisor at 541-574-5871, or Tim Gross, Director of Public Works at 541-574-3366.
