## CONTRACT CHANGE ORDER NO. 3 (Continued)

AIRPORT: LOCATION: PROJECT NAME: PROJECT NO:		Newport Municipal Airport Newport, Oregon Storm Pipe Rehabilitation and Outfall F Erosion and Slope Repair AIP #3-41-0040-027-2020
	ONTRACTOR:	Michels Corporation 5/30/2023
DΑ	TE:	JUSTIFICATION FOR CHANGE
1.	Brief description of t	the proposed contract change(s) and location(s).
	Bid Item CO3-1 - The change, including wir personnel and equipm	e installation of the flexible joint seals on the southern pipe will be required to occur in the summer of 2023. The costs associated with this attribution of the project area in order to leave the project area in a safe and usable state. It includes cost for the contractor to remobilize nent and set up bypass/diversion of the pipe to isolate the work area. Due to limited available funding, the northern pipe will require flexible nnder a future AIP project.
	Bid Item CO3-2 - The airport.	e work includes cleaning, CCTV, and installing flexible seals on each joint for the southern pipe that helps convey Grant Creek under the
<i>2</i> .	Reason(s) for the cha	ange(s).
	Bid Item CO3-1 - Du originally intended. I liner, it was determine window as approved the same year as init. Bid Item CO3-2 - In: adjacent the pipe is a	uring initial construction, it was found that the pipes were moving that would not allow successful installation of the geopolymer material as It suspected that there are voids adjacent to each pipe that is allowing the movement to occur. Since the geopolymer application acts as a rigid ned that the installation would not be successful due to the pipe movement. Work on the pipe is only allowed during the in-water work by the Oregon Department of Fish and Wildlife (typically July 1 to September 15). Installation of the flexible seals could not be completed ial construction and requires the contractor to complete the work in a subsequent year.  stallation of flexible seals will allow movement of the pipe while preventing additional infiltration and pipe bedding loss. The loss of soil a concern as sinkholes can develop over time that may impact airfield operations if not addressed. Application of the flexible seals is a time as the joints are approximately 4' apart for a total pipe length of approximately 1,350'.
3.	Justifications for un	it price or total cost.
		erformed for bid items associated with Change Order #3 consistent with guidance provided in the AIP Handbook. The cost analysis was iiques described 49 CFR § 18.36(f).
4.	The sponsor's share	of this cost is available from:
	N/A, project is 100%	FAA funded. If required, City funds will be used.
5.	If this is a supplemen  ☐ Yes ☐ No ☑ Not Applicable	ntal agreement involving more than \$2,000, is the cost estimate based on the latest wage rate decision?
