**CITY OF NEWPORT
2017 WATER QUALITY REPORT RELEASED**

The City of Newport Annual Water Quality Report is available for viewing on the city website at <http://www.newportoregon.gov/dept/pwk/waterquality.asp>. Additional copies are available at the Public Works Department, located at the Newport City Hall, 169 SW Coast Highway, or by contacting the Public Works Department at 541.574.3366.

We are proud that this year, as in years past, the city's tap water met all U.S. Environmental Protection Agency and state drinking water health standards. The water quality report is designed to inform the public about the quality of water and the services the city delivers every day. The city's goal is to provide a safe and dependable supply of drinking water. The city makes every effort to continually improve the water treatment process and protect our water resources. The water quality report is a requirement of the 1996 Safe Drinking Water Act to increase public awareness of drinking water issues and to serve as a method for customers to make informed decisions regarding their drinking water.

If you have questions or would like more information, contact Steve Stewart, Water Treatment Plant Supervisor at 541.574.5871, or Timothy Gross, Director of Public Works/City Engineer at 541.574.3366.
