Water Main Work – Possible Dirty Water or Pressure Fluctuations

The City will be performing repair work on the water feed line for the City's main water storage tanks beginning Wednesday, March 14th through Friday, March 16th. No water disruptions are expected, but customers may occasionally experience dirty water or pressure fluctuations. If you experience dirty water, please run the cold water tap for several seconds until the water runs clean. Dirty water generally runs through the system in bursts and passes by individual services quickly.

Please contact Public Works with any questions or concerns at 541-574-3366. Thank you for your patience.
