ISSUE #7

## Project Status July 20, 2016

by Tim Gross, Director of Public Works/City Engineer

Good morning! The Contractor will be starting to install roof decking at the Aquatic center beginning this morning. The roof decking is installed using a fastener driven by a charge similar to a .22 shell. It will sound like gun shots so please do not be concerned. There are thousands of these fasteners and the roof decking will take about 2 weeks to complete so the City Hall campus will sound a little like the O.K. Corral. Pictures of what the roof decking looks like are attached to this update. Please do not hesitate to call if you have questions. Thank you. -Tim
